June 7, 2019

For Immediate Release:

North Lakeland Discovery Center to hold second annual Float Your Boat Trivia Rally on Saturday, June 22

Manitowish Waters, WI – The North Lakeland Discovery Center invites you to join us on Saturday, June 22 for a fun-filled day on the Manitowish Chain of Lakes for a scavenger hunt. You'll answer questions and compete in challenges on the water using your smartphone or tablet, then meet up back at the Discovery Center for an evening barbeque and awards. The scavenger hunt is from 12:00 PM to 4:00 PM, and the barbeque and awards ceremony is at 5:00 PM.

This event is sure to test and increase your knowledge and awareness of Northwoods ecology and history. Participants must provide their own boat and obey all DNR water safety rules. Awards will be given for best theme, best pictures, and highest points.

Emily Heald, Water Program Coordinator at the Discovery Center, shared some memories of last year. "We had a great day on the Chain

and our teams had a blast." Emily said, continuing, "We've got new trivia and challenges planned this year, so be prepared to have even more fun!"

So enlist your crew of up to eight, and give the Discovery Center a call at (877) 543-2085 to get signed up. \$75 per team. All proceeds support the North Lakeland Discovery Center and its mission of connecting people, nature, and community. See you there or WALK THE PLANK!

About the North Lakeland Discovery Center

The North Lakeland Discovery Center (DiscoveryCenter.net) is a 501(c)(3) not-for-profit environmental education center located in Manitowish Waters, Wisconsin. Our mission is to enrich lives and inspire an ethic of care for Wisconsin's Northwoods through the facilitation of connections among nature, people and community. Our education programming offers a variety of community programs throughout the year for all ages, as well as drop-in activities including canoeing, kayaking, and free guided hikes. Our water program works with local towns and lake associations on lake management planning projects, and aquatic invasive species education, prevention, and management.
